A GROWING CHALLENGE FOR MODERN LIVESTOCK PRODUCTION

High temperatures combined with humidity can challenge thermoregulation, feed intake, hydration, metabolism and productive performance.

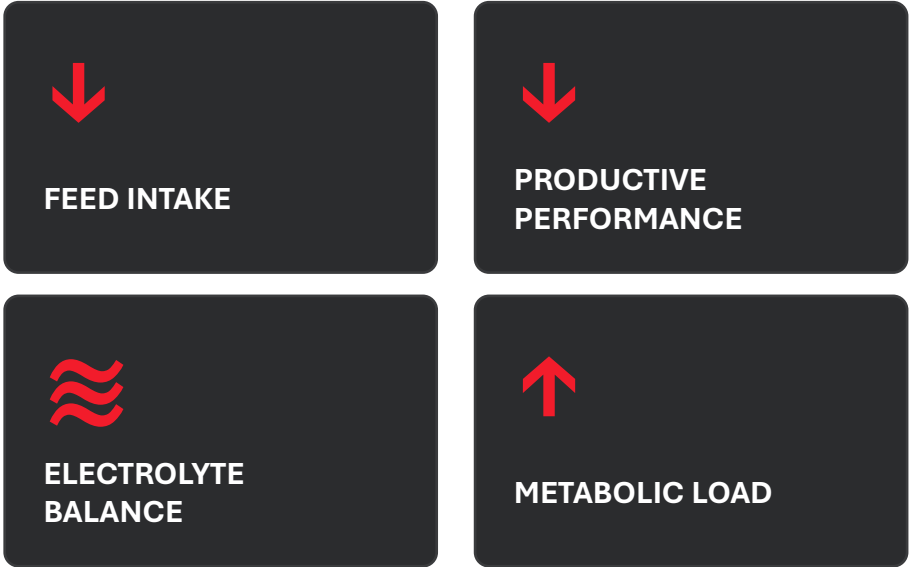

Heat stress is a significant challenge for livestock **health, welfare** and **productivity**. The combination of **high temperature and increased humidity** can affect thermoregulation, feed intake, hydration, metabolism and productive performance.

TARGETED NUTRITIONAL APPROACH

Pharmacell offers specialized nutritional solutions to support animals under heat-stress conditions, with emphasis on:

- THERMOREGULATION
- FEED INTAKE
- HYDRATION & ELECTROLYTE BALANCE
- METABOLIC SUPPORT
- PRODUCTIVE PERFORMANCE

Mediterranean expertise
for increasingly demanding climate conditions.

PART OF A GLOBAL COMMUNITY OF COMPANIES

Our certified systems ensure **controlled production processes, traceability** and **consistent quality** throughout our manufacturing operations.

PARTNERSHIPS THAT STRENGTHEN OUR EXPERTISE AND SOLUTIONS

Pharmacell collaborates with established international partners, expanding its expertise and portfolio in animal nutrition and health. Through long-term, trusted partnerships, we leverage specialized products, raw materials and know-how to deliver comprehensive, high-quality solutions to the Greek and international markets.
